SCHOOL OF DENTAL SCIENCES**

DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

**MAY 2026
(Month / Year)**

Total no. of OPD patient for the month - 11786

Details of major clinical procedure being performed-

S/n	OPD No.	Age / Gender	Clinical & Radiographic Findings	Provisional Diagnosis	Special Remarks
1	660330	39/M	Large exophytic / ulceroproliferative lesion involving the lateral and dorsal tongue with irregular erythematous areas and a slough-covered surface.	Ulceroproliferative growth involving the lateral border and dorsal surface of the tongue — suspicious for squamous cell carcinoma.	Malignancy of dorsal and lateral aspect of tongue and requirement of Surgical Intervention.
2	693964	69/M	Ulceroinfiltrative present on the left maxillary posterior alveolar mucosa extending to left buccal mucosa with blackish pigmentation over soft palate and junction of soft and hard palate. Whitish non-scrapable lesion present on the left buccal mucosa extending to left Mandibular posterior region of 37 and 38. R/F: OPG shows ill-defined radiolucency extending from alveolar crest to the floor of left maxillary sinus with discontinuation of sinus floor.	Malignancy of left maxillary posterior and buccal mucosa region.	Malignancy of buccal mucosa with oro-antral communication and requirement for Surgical Intervention
